Notes

The equipment installed in the house is property of the client (Canopy, Cpe, Sipura, power supplies, cable, etc.)

The damages caused to the equipment will be paid by the client. It is advised to contract a SAI.

The operating system has to be windows 2000 or higher.

For calculating the fees, the inactivation periods will adapt to full calendar months, so if these periods should not coincide, in order to calculate the inactivation and activation dates, the first day of the next month or the first day of the present month will be applied respectively.

The activation and deactivation, with regards to the fee, will be counted from the first and last day of the month respectively.

Every action of activating and inactivating a telephone connection will be understood as a service.

The lack of payment entails the disconnection of the system. To resume the service, you will have to register again.

For registrations of pre-existent equipment, the fee will be increased by the expenses derived directly from the reinstallation, revision or substitution of the equipment.

Prices do not include 21 % VAT
